Kune - Enhancement #448
User settings: unclear for newbies what Style/License/Tools it changes

Description

In user settings, although "General", "Security" and "Avatar" are very clear, others are not. "Tools", "Style" and "License" refer to the user's personal space. However, messages refer to
- "the tools used" (in general?),
- "Change this workspace theme" (which workspace?),
- "license for all the contents of this group" (group?).

Besides, I would
- exchange order or Avatar and Tools, so Tools+Style+License all refer to the same personal space.

PS: I mark this as "easy"
