Target version:			
Resolution:		**Tags:**	easy

Description

Feedback by http://kune.cc/Johnarupire:

> *some friends tell me about difficulty to recover these passwords. I think we can send they a link to do this in all email notification. Maybe this link can help us to keep the participation and use of Kune to these friends... what do you think? Maybe some line like this? (*)*

(*) Attached footer of the email notifications, modified. Added "If you forgot your password, come here to recover it". Improved sentence: "If you forgot your password, recover it in this link".

PS: I guess including a link to "http://kune.cc/#!signin()" would do, as there is no direct link to the password recovery dialog (or I don't know it).
