<b>Description</b>			
<p>After several tests with people, both Dario and Sara had problems when creating the username. Both were insisting to use a name with capital letters, even though they were reading the (!) error.</p> <p>A similar problem occurred when creating a group.</p> <p>I don't know how to solve this, but I have three suggestions. I would apply the three, but probably the third takes more time.</p> <p>Suggestion 1:</p> <ul style="list-style-type: none"><li>- ask "Name" before "Username" in user creation. It's more intuitive.</li><li>- ask "Long name" before "Short name" in group creation</li></ul> <p>Suggestion 2:</p> <ul style="list-style-type: none"><li>- In the (!) description, maybe "lowercase" should be in bold?</li></ul> <p>Suggestion 3:</p> <ul style="list-style-type: none"><li>- Maybe we can auto-generate a short-name or username based on the long-name introduced before, as a proposal that can be changed.</li></ul>

Contraproposal to 3: auto-change to lowercase the name you enter when you jump for one field to another.

1min of work...

I agree with Contraproposal to (3). I'd also do (1).

**#4 - 04/19/2012 02:01 AM - Anonymous**

From #181 (closed)=> also auto-change to lowercase:

- the username in the log-in dialog (not just in the sign-in dialog).
- the group name in the register-group dialog

- *Status changed from Closed to In Progress*
- *Assignee changed from Vicente J. Ruiz Jurado to Samer -*
- *Priority changed from Urgent to Normal*
- *% Done changed from 0 to 50*
- *Resolution deleted (fixed)*

I reopen this issue instead of creating a new one. I'd do "Suggestion 1" even if comment #4 was done, is it ok? I can assign it to myself.
