History

#1 - 09/03/2012 04:32 PM - Vicente J. Ruiz Jurado

- Status changed from New to In Progress

- Assignee set to Samer -

- % Done changed from 0 to 50

We are already using hashbangs in the client, but some more little work should be done, because seems that Google is not indexing us. Maybe an index of contents, I don't know, but should be a usual problem.

#2 - 09/16/2012 02:06 PM - Samer -

- Do we have Java servlets that provide the HTML snippets?
  - If we don't, I'm not sure how to build that. Google just need the contents in a HTML snapshot, after the JS was executed.
- If we do, we still need to create a Site Map in XML such as
  http://www.spiffyui.org/sitemap.xml

Besides, we might need to register in Google Webmaster Tools to tell Google to scan Kune.cc pages. Do we do it with our personal google accounts, or do we create a Comunes google account?

#3 - 11/01/2012 06:36 PM - Vicente J. Ruiz Jurado

Started again with this

#4 - 11/28/2012 12:25 AM - Vicente J. Ruiz Jurado

Pending:

- take into account big sitemaps
- utf8 contents seems it's not working
- the time to generate a page is big (needs tunning)

#5 - 11/28/2012 02:57 PM - Vicente J. Ruiz Jurado

- Status changed from In Progress to Closed

- % Done changed from 50 to 100

Applied in changeset commit:dcdc3a90ebdd405ba66f5218ddb22a3203cf0795.

#6 - 03/04/2013 10:03 AM - Vicente J. Ruiz Jurado

- Status changed from Closed to In Progress

- Assignee changed from Samer - to Vicente J. Ruiz Jurado

- % Done changed from 100 to 50

Reopened. Current status:

- Sitemap is not yet generated in large sites
- Page static generation via htmlunit perf issues
- minor issues like #438

Urls to test:
