Description			
<p>Hello I am a Debian testing user and I use Fireefox which is named Iceweasel in Debian. The version shipped in testing is 10.0.5 as of today. When I try to open Kune it says that my browser is not supported. Maybe is just because the name is different (Iceweasel instead of Firefox)? Version 10 is not so old... Thanks</p> <p>Steps to reproduce: Open http://kune.cc with Iceweasel 10.</p>

It's because your firefox version is old (and doesn't support websocket). The message will be more accurate in short. See
commit:55553e49f16a4e1973079e7638c941b4b03829ec

I've this problem, too. And now the spanish translation is wrong, too.

Can you paste here the output of whatsmyuseragent.com (for instance) ?

I think that you are using a old firefox versión (mine 17) that don't support websocket:

<http://jimbergman.net/websocket-web-browser-test/>

I have fixed the dialog Spanish translation (will be online in some days). I close this issue.

I think is supported since version 11:

<https://developer.mozilla.org/en-US/docs/WebSockets#AutoCompatibilityTable>
