| <b>Resolution:</b>   |     |                        |            |
| <b>Description</b> <ul style="list-style-type: none"><li>- Alice is discussing things in a wave with other users</li><li>- Alice copies some text from one of the blips that are comments (not the main blip, with grey background instead of white)</li><li>- Alice opens another wave and pastes that text there, in the main blip</li><li>- Alice is shocked: the pasted text has a grey background color</li></ul> <p>That is, when copying from a blip, if the background of the font is the same one as the color of the blip, it should be copied with no background.</p> <p>PS: This is particular to Kune, not to Wave, as WIAB does not change the background color of the comments.</p> |     |                        |            |

#### History
