Description			
<p>Sometimes I find an interesting doc somewhere and I'd like to copy it to my personal space ("fork it"), and maybe make my own version of it.</p> <p>Ideally, I should be able to do this with documents of groups that I am not member of.</p>			

History

#1 - 11/14/2012 02:00 PM - Vincent Osele

Could insert automatically a link to the original wave, to keep a trace from it.

User could remove later if he don't want it.

This could be (partially) covered also by a *bookmark* or *favorites* tools center (like documents/wiki...) in user space...
