Target version:		Tags:	
Resolution:			
Description			
<p>Sometimes I have a wave in my Inbox that is a "message" (it doesn't belong to any group neither to my personal space), but I would like it to be in my personal space. I'd like to copy (or move) it to my personal space.</p> <p>Ideally, I should be able to do this with waves I didn't even create (without copying the members).</p> <p>Related: #375-Copy a group doc to my personal space</p>
