Description			
Discussion here: http://kune.cc/#!kune.lists.6511.7232			
This doc: http://kune.cc/#!kune.tasks.15.5775 appears in top of my inbox with a time of 17h24. In the wave, all blips are at max 06:59 in the morning of current day. In the deeper zone of my inbox, I have some strange waves that are before my Welcome message (my first auto create wave when I just connect to kune). One have a intermediate date, 6 nov or some time 1 jan 1970. (deponds on refresh it seems) One have 0 msgs. All have -- (unknow) in sample text show in inbox right pane. When I click on it, I get problem reading message. Here are the waves (without locale): <ul style="list-style-type: none">- http://kune.cc/#!googlewave.com/w+HSBQMj8QD 0 msg, unknow, 1970- http://kune.cc/#!kune.cc/w+ellbiJTCC 1 msg, unknow, 11 nov- http://kune.cc/#!kune.cc/w+rxjxf59jf6i6A 0 msg, unknow, 8 nov
