Description

I installed kune using the Debian package (I tried both 0.3.0+b13 from unstable and 0.2.0+b34 from stable) on Debian Wheezy. After starting kune using "service kune start" I try to navigate to http://localhost:8888 but I end up with a "503 Service unavailable" error page. The kune log (attached) indicates that there were some Guice creation errors ultimately caused by "org.hibernate.HibernateException: Missing column: logoLastModifiedTime in kune_prod.groups"
